

ScholarlyStats Consolidated Usage Statistics Management Now Available Through EBSCO

13th June 2006

London (UK), Birmingham, AL (USA)

In partnership with MPS Technologies, EBSCO Information Services is a new global provider of ScholarlyStats, a usage statistics management portal providing library administrators with a single point of access to all of their vendor usage stats.

ScholarlyStats provides the library with a suite of monthly usage reports. These reports are based on the standards of the COUNTER Code of Practice. Collectively the reports measure not only the activity of library resources, but also research trends, including the total number of journals accessed, total use by platform, average use by platform, most and least used journals and more. Usage data for EBSCOhost's database products is included within ScholarlyStats.

Jayne Marks, CEO at MPS Technologies said "ScholarlyStats is a unique service with a rapidly growing user base and we are delighted to be working with EBSCO to make this more broadly available, to help libraries with the collection and analysis of their usage statistics."

About MPS Technologies and ScholarlyStats

MPS Technologies provides a range of technology-driven services specifically designed to support libraries and publishers. These services include web analytics, fulfillment services and content delivery. MPS Technologies is part of the Macmillan group of companies and has offices in London, Boston, New York, Basingstoke, Hamburg and Delhi.

ScholarlyStats provides libraries across the globe with consolidated vendor usage statistics. ScholarlyStats collects, standardizes and consolidates journal and database usage reports, providing libraries with a single point of access to their valuable usage data.

About EBSCO Information Services

EBSCO Information Services provides libraries and research centers with electronic and print journal subscription services, e-resource access and management services, full-text and secondary database development and access, an OpenURL-compliant link resolver, e-books, Web-based book purchasing and related information services. EBSCO maintains a title database of more than 300,000 title listings and upholds relationships with more than 78,000 publishers around the world.

EBSCO's 32 Regional Offices worldwide are staffed with personnel who speak the local language and understand the particular challenges faced by librarians in their areas, offering a uniquely personal level of service. Specialized divisions serve academic, biomedical, government, public, school and special libraries as well as corporations.
